

PRESS RELEASE

Bordeaux, 2021 October 19th,

**UBLEAM : SELECTED TO JOIN FRENCH PLANT 4.0 ACCELERATOR FROM
TOTALENERGIES AND ITS PARTNERS**

It is official : UBLEAM has been selected to join PLANT 4.0 with 5 other startups Akanthas, Climeon, Cintoo, NANOZ and Samotics.

Accelerator Plant 4.0 sustains digital technology deployment in industrial activities and identifies the most disruptive startups in INDUSTRY 4.0 .

Operated by IMPULSE PARTNERS, it has been funded by TotalEnergies & its Corporate Partners : Air Liquide, Eiffage, Orano, Saint Gobain et Solvay.

Plant 4.0 firstly boosts startups visibility by promoting them to industrial partners and opening them the opportunity to attend big event such as CES Las Vegas. The real added value stands in capacity build INDUSTRY 4.0 ecosystem in which startups can experiment, identify business cases and can deploy their solutions.

The 3 pilars of this Plant 4.0 :

- Asset optimization
- Augmented operator
- Low carbon

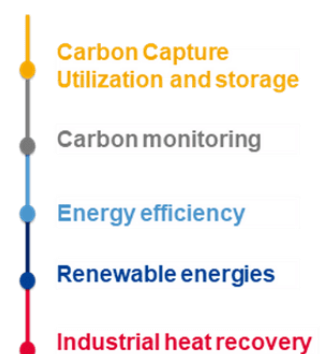

Asset optimization

Augmented operator

Low Carbon

UBLEAM fill the first two pillars by simplifying asset management and digitalizing field operations (inspections rounds, maintenance, ...) to simplify work force (form edition on mobile, digital documentation, task optimization).

Already deployed in several industrial sites in Europe (France, Belgium, Holland) and in Africa (Angola, Tanzania), deployed by manufacturers in global world, UBLEAM solution growth after crisis thanks to **restart of plants** and thanks to **digital demand for critical operations and remote supervision**.

In disruption with IoT technologies, UBLEAM solution has been enriched with multiple innovations during crisis : digital logbook, (documentation, reports) accessible on mobile and web, data supervision for collected data (scans, assets data, reports), worker tasks and workflows. It is dedicated to sites directors, facility managers, maintenance responsables and marketing directors in OEM companies.

UBLEAM confirms its winning position of ergonomic and collaborative solution for asset management, helping businesses to reduce humans risks, increase asset availability while reducing operation cost by more than 20 %

To carry on its growth in 2021 (+ 50% customers, + 60% monthly recurring revenues), UBLEAM has just launched a project to find an industrial / software partner to develop its (potential of 350 deployables sites within 3 years).

UBLEAM solution

Ubleam permet de simplifier l'usage des objets en réalité augmentée et de digitaliser tout le cycle de leur maintenance pour le bien du fabricant, du technicien et de l'utilisateur final.

Grâce à l'application mobile, les utilisateurs peuvent scanner le tag, disposé préalablement sur l'objet, et accéder ainsi à un ensemble de services de données agrégées autour de l'objet (documentation technique, vidéo tuto, assistance, garantie, rapport d'intervention, achat de pièce) pour assurer la maintenance, optimiser la relation client ou communiquer auprès des usagers, le tout en réalité augmentée.

La plateforme en ligne Ubleam FUSION, vous permet de configurer votre espace de travail, de personnaliser vos interfaces en réalité augmentée et de visualiser l'ensemble de vos statistiques.

A propos

Ubleam a été créée en 2011 par Samuel Boury et Olivier Mezzarobba pour simplifier l'accès à la documentation sur le terrain.

Basé à Bordeaux et Toulouse au sein des Villages by CA, Ubleam compte plus de 40 clients

industriels de tout secteur (Total, Air Liquide, Suez, Sanofi, Pentair, ...) et une dizaine de collaborateurs.

Sélectionné en 2021 pour rejoindre Plant 4.0 accélérateur de TotalEnergies, UBLEAM poursuit sa croissance sur le marché de la gestion d'assets qu'elle adresse depuis 2019 avec sa plateforme SAAS ergonomique et collaborative.
